Claude ko ek reference video aur apna raw video do, aur woh usi style mein cuts, captions, zoom aur sound effects ke saath edit karke de deta hai. Neeche poora process hai, prompts ke saath.

Kya chahiye

- **Claude** (app ya claude.ai), jahan Claude aapki files par kaam kar sake
- **Reference video:** jis style mein edit chahiye, uski file. Link nahi chalega, file upload karni hogi
- **Aapka raw video:** 2 se 3 minute se chhota ho to best result milta hai
- **Extra assets (optional):** logo, outro clip, product ki PNG photo

Process: 7 steps

1. **Reference video upload karo.** Jo editing style pasand hai, us video ki file Claude ko do.
2. **Style analyse karwao.** Claude video ke frames nikaal kar cuts ki speed, caption style, zoom, background aur sound effects ka breakdown deta hai.
3. **Breakdown approve karo.** Jo cheez nahi chahiye ya badalni hai, yahin bata do. Edit shuru hone se pehle sudhaar sasta hai.
4. **Raw video aur assets upload karo.** Saath mein apni special instructions likho. Example: "is pause par slow zoom aur thrill wala sound", "last line par meri outro clip chale, mera chehra nahi".
5. **First cut check karo.** Teen cheezein dekho: awaaz ka level, captions ka timing, aur captions ki spelling.
6. **Corrections do aur re-render karwao.** Saare changes ek hi message mein do, taaki ek hi baar mein theek ho jaye.
7. **Music lagao aur post karo.** Trending track Instagram ya YouTube ke andar hi add karo, reach behtar milti hai.

Copy-paste prompts

Ye teen prompts poora kaam nikaal dete hain. Bracket wali jagah apni detail bharo.

Prompt 1: Style analysis (Step 2)

> The attached video is my reference. Analyse its editing style completely: cut pace, caption font, colour and position, zooms, background, colour grade, and sound effects. Give me a style breakdown block by block with timings. I will share my raw video after I approve the breakdown.

Prompt 2: Edit (Step 4)

This is my raw video. Edit it in the same style as the reference. Remove pauses and retakes. Add captions in Roman Hinglish with keywords highlighted, and never cover my face with a caption. Special instructions: [apni instructions]. Use the attached [logo / outro / product image] where it fits. Output as 1080x1920 vertical.

Prompt 3: Corrections (Step 6)

Changes for the next version: 1) [change] at [time]. 2) [change] at [time]. 3) Fix these caption spellings: [galat word] to [sahi word]. Keep everything else the same and re-render.

Limits aur tips

Claude editor nahi, coder hai: woh code likhkar video edit karta hai. Isliye kuch cheezein aapko khud dekhni hongi.

Limit	Kya karein
Claude awaaz sun nahi sakta	Sound level aur caption timing khud check karo
YouTube ya Insta link se video nahi utha sakta	File download karke upload karo
Hinglish captions mein spelling galat ho sakti hai	Ek correction round rakho (Prompt 3)
Heavy motion graphics aur 3D effects exact copy nahi hote	Milta-julta version milega, expectation wahi rakho
Background change har video par saaf nahi aata	Plain deewar aur acchi lighting mein shoot karo
Lambi video mein time aur usage zyada lagta hai	Clip 2 se 3 minute se chhoti rakho
Badi file compress hokar milti hai	Reels aur Shorts ke liye quality theek rehti hai

Ek zaroori baat: reference video se sirf style seekho. Kisi aur ka footage, music ya logo apni video mein mat daalo.
